

Testing is now available if you are ill

Those with symptoms of Corona (Covid-19) can now test themselves. Self-use tests to check if you have been infected can be ordered through 1177.se. You then hand them in to find out if you are infected.

If you have symptoms of corona infection you can order the self-use test. You need e-identification to order through the webpage 1177.se. Ask someone without symptoms to pick it up.

You will be sent a small packet of test-sticks. Use them to take samples from your nose and throat. Pictures in the packet show how to do this.

Then ask someone without symptoms to hand it in where it was picked up.

You will receive the answer within 48 hours. To see it, you need to log in to 1177.se again. If you are infected, you will be informed what restrictions to follow. If the Region (the authority in charge of health care) needs to track the infection they will phone you.

Everybody in the county feeling ill can take the test. It is free of charge.

If you don't have an e-identification and are unable to log on to 1177.se, you can phone your health care center.

Fetch and deliver your test at the pharmacy (Apoteket)

Someone healthy must pick up and hand in your test at the pharmacy. This person needs to bring your identification card as well as their own. The person feeling ill is *not allowed* to fetch or deliver their own test. Other people may be infected by him/her.

Foreign visitors are not able to order their test

If you are a foreign visitor you can not order your own test. You will need to phone your local health care center. Only those with symptoms are tested.

When you have ordered your test, it can be picked up at several pharmacies in the county. Which ones will change as more pharmacies are connected. Use the QR code to see which ones have the test now.

You can also pick up and hand in your test near the health care centers in Vimmerby and Borgholm. In Löttorp on Öland nursing staff offer help with testing.

Attention! The test only shows if you are presently infected with Corona. It does not show if you have had the infection earlier. These tests are not available yet in Kalmar county.

Information sheets every other week

This information sheet comes from Kalmar County Crisis Collaboration. We intend to provide correct information from our county. During summer we will publish "Nytt om Corona" (Corona Update) every other week. If something dramatic happens it will be published more often.
